

BERTOLINI™

MILLENNIA SERIES

The **Millennia Series** is a customizable pew stacker with enhanced features and styling. Completely manufactured in the USA, these chairs utilize only the highest quality materials and innovative manufacturing processes to ensure longevity and value. Our proprietary, dual-density 3.5-inch foam cushion and contoured Ergo-V backrest with silhouette styling (with no exposed frame,) make it easy for congregations to stay comfortable and focused on what really matters—worship!

PRODUCT FEATURES

- 1** Superior comfort and durability is guaranteed with this fully upholstered Ergo-V back
- 2** Exclusive dual-density foam cushioning and a rolled front edge provide years of comfort
- 3** Supports up to 1,000 lbs with the heavy-duty 16-gauge cold-rolled steel frame and integrated torsion bar
- 4** Sturdy wooden seat features 3.5-inch dual-density foam and T-Nut metal-to-metal fastening
- 5** Never worry about swivel glide failure and exposed frame corners with these booted rocker glides

STANDARD FABRIC OPTIONS

STANDARD FRAME OPTIONS

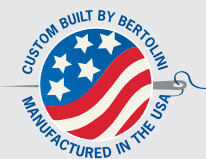

DESIGNER FRAME OPTIONS

BERTOLINI MODULAR SYSTEM

All Bertolini models, including arm chairs, interlock with each other to provide mix and match modular flexibility.

LIMITED
LIFETIME WARRANTY

FULLY UPHOLSTERED OUTER BACK

The fully upholstered back provides superior look and sound absorption.

ERGO-V ERGONOMIC BACK FOUNDATION

The multi-contoured V shape supports the lower back and cradles the upper shoulders.

FABRIC

Our commercial-grade polyolefin fabrics are double-rub tested up to 250,000 times without showing signs of wear.

FINISH

The ultra-durable powder-coat is electrostatically applied and baked at over 400°, and then saltwater tested for more than 800 hours.

EXCLUSIVE DUAL-DENSITY FOAM

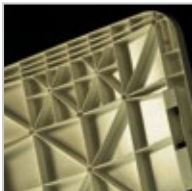

The commercial grade dual-density virgin foam ensures all-day comfort and resiliency for the life of the chair.

STRONGEST FRAME

The 16-gauge bar system features 1010 cold-rolled carbon steel with integrated torsion that supports up to 1,000 lbs—all made in the USA!

STACK BUTTONS

The extra-wide stacking buttons provide efficient stacking to protect your investment.

ERGO-V BACK DESIGN

Proprietary Ergo-V support system provides ergonomic comfort and durability while creating a lighter, easier to handle chair.

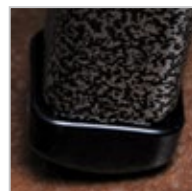

RADIUS-EDGE ELEGANCE

Our exclusive radius-edge steel frame provides a softer, more elegant look while extending the life of the finish when stacked.

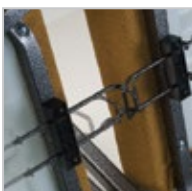

T-NUT FASTENERS

The t-nut metal-to-metal fastening gives rock-solid durability.

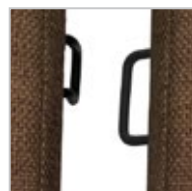

BOOTED ROCKER GLIDES

The noncorrosive, ribbed, and booted self-leveling rocker glides eliminate swivel-glide failure.

RETRACTABLE INTERLOCK GANGING

The retractable ganging interlocks easily mount under your chair for linking the chairs into rows.

STANDARD GANGING

The straight interlocks hold chairs tightly together. Available at no additional charge.

RADIUS GANGING

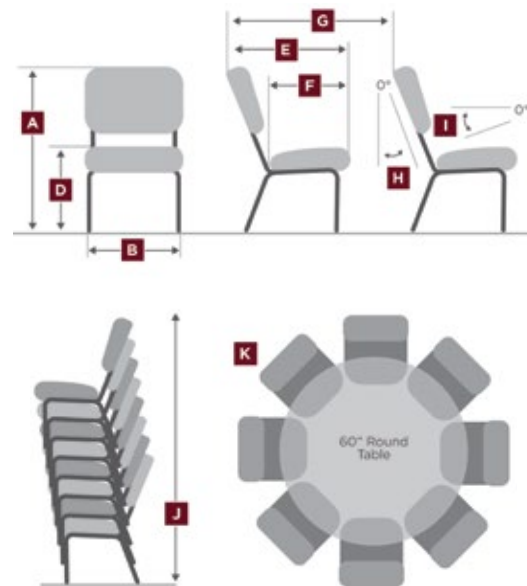

The radius interlocks allow enough space to form a gentle curve. Available at no additional charge.
